- A. Manual keyword mapping only
- B. Prompt flows with conditional branching
- C. Static SharePoint lists
- D. Email-only workflows

Answer = B

4. Manufacturing Industry – Maintenance Support Agent

- A. Sequential orchestration logic
- B. Randomized workflow execution
- C. Spreadsheet automation only
- D. Passive document storage

Answer = A

5. Insurance Industry – Claims Processing

- A. Hardcoded menus only
- B. Prompt engineering with contextual responses
- C. Manual PDF review
- D. SharePoint folder permissions

Answer = B

6. Telecom Industry – Multi-Channel Deployment

- A. Elimination of authentication
- B. Centralized conversational experience across channels
- C. Removal of orchestration requirements
- D. Reduction of internet dependency

Answer = B

7. Education Industry – Student Attendance Assistant

- A. Data connectivity and workflow logic
- B. Gaming engine integration
- C. Video rendering capability
- D. Cryptocurrency support

Answer = A

8. Aviation Industry – Employee Knowledge Copilot

- A. Faster access to organizational knowledge
- B. Increased hardware dependency
- C. Removal of employee authentication
- D. Elimination of collaboration tools

Answer = A

9. E-Commerce Industry – Order Tracking Workflow

- A. Predictive hardware scaling
- B. Conversational workflow orchestration

- C. Static report generation
- D. Batch file processing

Answer = B

10. HR Industry – Recruitment Assistant

- A. Improved contextual understanding and automation
- B. Elimination of HR policies
- C. Reduction of employee count
- D. Manual interview scheduling only

Answer = A

11. Logistics Industry – Shipment Escalation System

- A. Conditional escalation flow
- B. Static response publishing
- C. Image recognition workflow
- D. Spreadsheet duplication logic

Answer = A

12. Healthcare Industry – Multi-Step Diagnosis Support

- A. Dynamic prompt flow logic
- B. File compression
- C. Random response generation
- D. Static HTML scripting

Answer = A

13. Banking Industry – Secure Internal Deployment

- A. Better integration with enterprise knowledge repositories
- B. Elimination of user permissions
- C. Public anonymous access
- D. Removal of authentication requirements

Answer = A

14. Retail Industry – Intelligent Cart Recovery

- A. GPT-powered workflow automation
- B. Manual spreadsheet updates
- C. Static menu navigation
- D. Offline document storage

Answer = A

15. Energy Industry – Field Technician Assistant

- A. Real-time enterprise knowledge access
- B. Cryptocurrency mining support
- C. Social media management only
- D. Gaming optimization

Answer = A

16. Pharmaceutical Industry – Compliance Validation

- A. Validation-based orchestration logic
- B. Randomized prompt generation
- C. Static PDF hosting
- D. Hardware virtualization only

Answer = A

17. Travel Industry – AI Booking Assistant

- A. Context-aware GPT interactions
- B. Manual workflow execution
- C. Offline spreadsheet management
- D. Static image rendering

Answer = A

18. Enterprise IT Support – Ticket Automation

- A. Intelligent workflow orchestration
- B. File archiving system
- C. Manual reporting mechanism
- D. Local desktop scripting

Answer = A

19. Hospitality Industry – Guest Service Copilot

- A. Website-based Copilot deployment
- B. Standalone spreadsheet application
- C. Offline desktop executable
- D. Hardware monitoring dashboard

Answer = A

20. Enterprise Collaboration – Departmental AI Agents

- A. Multi-agent orchestration strategy
- B. Independent disconnected bots only
- C. Static webpage deployment
- D. Manual email routing system

Answer = A
